+1 (484)-925-9118 | siwu430@gmail.com | siwuli.com | github.com/siwu-945

Education

Drexel University
BS in Computer Science

Sept. 2020 – June 2025
GPA: 3.60/4.00

Technical Skills

Languages: C#, Java, JavaScript, TypeScript, Python, C++, C, HTML/CSS, SQL
Framework/Libraies: React, Tailwind, Node.js, Express.js, Socket.IO, WinForms
Developer Tools: AWS, CI/CD (TeamCity, AWS CodePipeline), Git, MySql, Perforce, Visual Studio

Experience

Software Engineer Co-op April 2024 – Sept. 2024
Susquehanna International Group (SIG) Bala Cynwyd, PA

- Developed full-stack C# WinForms application using MVVM to deliver real-time pricing for 50,000+ bonds
- Implemented .NET back-end services integrated with DevExpress UI framework for responsive user interfaces
- Designed a multi-threaded queue-based system, cutting application response time by 90% to 0.5 seconds
- Optimized multi-terabyte data processing in an algorithmic trading project by 72%, reducing time to 3 min/GB for efficient data transmission via company-wide UDP multicast distribution

Cloud Developer Co-op (Contract) April 2023 – Sept. 2023
Bristol Myers Squibb Princeton, NJ

- Engineered serverless AWS applications with SCIM APIs to cut software license subscription costs by 25%
- Streamlined CI/CD by migrating to AWS CodePipeline, saving 6+ hours of manual effort weekly
- Implemented Infrastructure as Code (IaC) using AWS CloudFormation for scalable, repeatable deployments
- Automated user workflows in web applications using JavaScript and Puppeteer to intercept HTTPS requests and bypass SSO authentication

Course Assistant Sept. 2022 – Present
Drexel University College of Computing and Informatics Philadelphia, PA

- Graded over 200 homework submissions per week using Python auto-grading scripts with optional feedback
- Held office hours to assist over 100 students with algorithm analysis and data structure implementation in C

Web Development Intern Aug. 2021 – Jan. 2022
CloudView Technology Limited Chengdu, China

- Developed web crawling system using Node.js and JSSoup to parse and process incoming data
- Enhanced web scraping accuracy by 30% with X-Path queries and regex for precise DOM node extraction

Projects

Touch Grass (Hackathon Project) | *JavaScript, React, Python* | github.com/humboldt123/touch-grass April 2024

- Secured 3rd place with \$1,500 cash prize out of 66 teams with 400+ participants in *Philly Codefest*
- Developed the REST APIs for the backend of Touch Grass, an AI-powered app, to collect and categorize user data, while integrating with the OpenAI API for personalized event recommendations

NoNo Music | *JavaScript, React, Express.js, RESTful API, AWS* | musicnono.com Oct. 2023

- Developed a full-stack Music Playlist Management Application in React frontend and Express.js backend
- Developed REST APIs with Node.js for CRUD operations, offering one-stop solution for playlist management
