+1 (484)-925-9118 | siwu430@gmail.com | siwuli.com | github.com/siwu-945

Education

Drexel University
BS in Computer Science

Expected Graduation: June 2025
GPA: 3.6/4.0

Technical Skills

Languages: C#, JavaScript, TypeScript, Java, Python, C++, C, HTML/CSS, SQL
Framework/Libraies: React, Tailwind, Node.js, Express.js, Socket.IO, WinForms
Developer Tools: AWS, CI/CD (TeamCity, AWS CodePipeline), Git, MySql, Perforce, Visual Studio

Experience

Software Engineer Co-op April 2024 – Sept. 2024
Susquehanna International Group (SIG) Bala Cynwyd, PA

- Built high-performance **C# full-stack** app to deliver real-time updates on 50,000+ fixed-income securities
- Implemented **.NET backend** integrated with DevExpress **UI framework** for responsive user interfaces
- Designed **multi-thread** system to optimize **server-side** performance, cutting application wait time by 90%
- Optimized **backend data processing pipeline** in an algorithmic trading project, reducing processing time to 3 min/GB for efficient **data transmission** via **UDP** multicast distribution

Cloud Developer Co-op (Contract) April 2023 – Sept. 2023
Bristol Myers Squibb Princeton, NJ

- Built **JavaScript** automation framework to intercept **HTTPS requests** and analyze **HTML** elements, providing weekly email updates on 500+ user subscription status
- Engineered **serverless** AWS applications with **SCIM APIs** to cut software license subscription costs by 25%
- Implemented **IaC** with **AWS CloudFormation** for on-demand environments and resource configurations
- Streamlined **CI/CD** process on **AWS CodePipeline**, saving 6+ hours of manual effort weekly

Course Assistant Sept. 2022 – Present
Drexel University College of Computing and Informatics Philadelphia, PA

- Graded 200+ homework submissions per week using **Python** auto-grading scripts with optional feedback
- Held office hours to assist 50+ students with **algorithm analysis** and data structure implementation in **C**

Web Development Intern Aug. 2021 – Jan. 2022
CloudView Technology Limited Chengdu, China

- Built web crawling tool in **JavaScript** using **Node.js** and **JSSoup** to extract web elements based on **HTML**
- Enhanced web scraping accuracy by 30% with X-Path queries and regex for precise **DOM** node extraction

Projects

Touch Grass (Hackathon Winner) | Backend Developer | github.com/humboldt123/touch-grass April 2024

- Secured 3rd place with **\$1,500** cash prize out of 66 teams with 400+ participants in *Philly Codefest*
- Developed the **REST APIs** for the **backend** of Touch Grass, an AI-powered app, to collect and categorize user data, while integrating with the **OpenAI API** for personalized event recommendations

NoNo Music | Full Stack Engineer | musicnono.com Oct. 2023

- Engineered a **full-stack** Music Playlist Management Application in **React** frontend and Node.js backend
- Designed **REST APIs** for **CRUD** operations, offering one-stop solution for playlist management
